Quercetin Phytosome[®]
proves performance,
speeds recovery.

takes it out of you. But now there's a better way to put it back in: Indena's Quercetin Phytosome[®].
is already well known for its antioxidant properties and ability to maintain a healthy immune
But now a new study has shown it improves performance and speeds recovery after sporting
opening up a whole new market. There's just one problem with quercetin: it's hard for the body
. That's where Indena's exclusive Phytosome[®] delivery system comes in. Quercetin Phytosome[®]
shown to have a favourable bioabsorption profile compared with unformulated quercetin. And
some[®] delivery system is fully food grade and completely safe. A clinical study on 48 amateur
athletes showed that Quercetin Phytosome[®] works better, faster, and at lower doses. In just
s, the athletes taking 250 mg twice a day of Quercetin Phytosome[®] recorded better performances and
recovery times compared with the control group. Learn more about how Quercetin Phytosome[®]
it your customers. Contact Indena today.
